

Life Settlement Assets PLC – Ordinary Share E

Investment Objective

The company's investment objective is to achieve capital appreciation by purchasing policies or portfolios of life settlement and mortality-related products in special or distressed situations.

Commentary

The life settlements market seems to have stabilized and embarked on a steady growth trajectory in the last two years, according to a new study by Conning. The second consecutive year of growth in the amount of face value settled may indicate a renewed interest in life settlements by investors. Investor interest reflects a combination of a prolonged low interest rate environment, continued investment allocations to non-correlating alternative asset classes, and the stability of the life settlement landscape. This stability results from greater investor understanding of the asset class and associated risks, a more favourable tax environment, and demographics trends driving a growing supply of policies that could be settled. Acheron Capital view remains that the current medical underwriting will result in significant market upheavals which, together with recession triggered liquidity pull out, will affect the asset class. Because of its pricing and management, our portfolios should be largely shielded from these forthcoming adverse effects.

The Share Class is reporting a performance of -2.14% for the month of October. No maturity was registered, affecting both performance and liquidity.
