

Life Settlement Assets PLC - Ordinary Share A

Investment Objective

The company's investment objective is to achieve capital appreciation by purchasing policies or portfolios of life settlement and mortality-related products in special or distressed situations.

Commentary

The Associated Press analysed life expectancy and demographic data for 65,662 census tracts, geographic areas that encompass roughly 4,000 residents. The AP found that certain demographic qualities — high rates of unemployment, low household income, a concentration of black or Native American residents and low rates of high school education — affected life expectancy in most neighbourhoods. For example, an increase of 10 percentage points in the unemployment rate in a neighbourhood translated to a loss of roughly a year and a half of life expectancy; similarly a neighbourhood where more adults failed to graduate high school had shorter predicted longevity.

The Share Class A is reporting a performance of -1.84% for the month of November. The HIV segment registered \$291k on six small policies, while the elderly segment registered about \$210k on one policy. Note that we have also been notified of an additional large maturity - the 3rd largest exposure - for November, but after the cut-off date for that month. The Top 10 coverage table will be updated, and the related performance taken into account, in the forthcoming December monthly.
