

Life Settlement Assets PLC – Ordinary Share B

Investment Objective

The company's investment objective is to achieve capital appreciation by arbitraging the demographic risk in the life settlement business. This strategy offers uncorrelated returns from traditional capital markets.

Insurance companies can underwrite more efficiently and cost-effectively using artificial intelligence, creating a substantial benefit by freeing up underwriters to focus on more complex and heterogeneous risks, where human judgement is more valuable. Cytora, a U.K. start-up that developed an AI-powered solution for commercial insurance underwriting, claims that they can shorten the seven-day underwriting process to 30 seconds via its API. This enables insurers to underwrite programmatically and build workflows that provide faster and more accurate decisions.

The Share Class is reporting a performance of -1.07% for the month of March. One maturity was registered in the non-HIV segment, for a total coverage of \$ 0.35M.
