Estimated NAV (USD) 90 498 983

NAV/Share 2.2686

The life settlements market could experience a double-digit compound gross market annual growth rate over the next decade, according to a forecast from investment management consultancy Conning. Looking beyond 2019, key drivers are favourable for continued growth in the life settlement market. The increased supply of investors will have a larger number of policies to select from because of the increasing number of retiring baby boomers. Additionally, the broad regulatory environment surrounding life settlements has stabilized and an increasing supply of settled policies supports the continued development of the tertiary market. Life settlements remain an appealing alternative asset class to investors seeking higher potential returns, relative to the current low interest rate environment.

The Share Class is reporting a performance of -0.74% for the month of October. Ten HIV maturities were registered, contributing a total Death Benefit of \$0.6M; no maturities were registered in the non-HIV segment this month. Currently, our estimation of A/E ratio until October is 86% for the HIV segment and 240% for the elderly segment.
