The coronavirus outbreak is feeling a lot less distant today for many Americans, even if they live far from any reported case. The total number of people who have contracted Covid-19 since the coronavirus reached the United States in January has grown to nearly 1,700 people. This will likely continue jumping as more tests become available and some facilities begin conducting drive-through testing. The early data from China and Italy suggested that older adults were the most vulnerable to the worst effects of the disease.

The Share Class is reporting a performance of -2.81% for the month of January. One maturity for a face value of \$0.05M was registered this month.
